

Company Profile

GDS

Technologies Ltd

GDS Technologies Ltd – Gas Detection Systems
Specialists in the manufacture of electronic gas detection
of most toxic, flammable and cfc refrigerant gases

Introduction to GDS Technologies Ltd

GDS Technologies Ltd formerly Gas Detection Services, was established in 1988, specialising in the manufacture of gas monitoring and gas detection systems designed for personnel protection against toxic, flammable and asphyxiate gases and hostile environment monitoring using a range of flow sample systems.

Since its inception the company has, through careful management and market research developed a range of products to meet virtually every requirement of industry from petrochemical through to light commercial.

GDS offer a full range of gas sensors for most types of gas monitoring, including carbon monoxide, refrigerant, carbon dioxide and flammable gas detection. To compliment the available range of gas sensors, we have a comprehensive range of control systems, including addressable gas detection equipment ideally suited to carbon monoxide, nitrogen dioxide and LPG monitoring on large car parks.

GDS have also developed a complete range of state of the art flow sample systems for hostile environments and marine based applications.

GDS have a dedicated field service department to deal directly with site commissioning and ongoing site maintenance.

The type of field service work that we provide includes site surveys, equipment recommendations and commissioning services as follows: -

- Inspection of installation work
- Pre-operational connections completed as necessary
- Equipment set-up and full operational testing
- Calibration of equipment
- Full system test of all ancillary equipment
- Client hand-over on completion
- On site and in house equipment training

Organisational Information

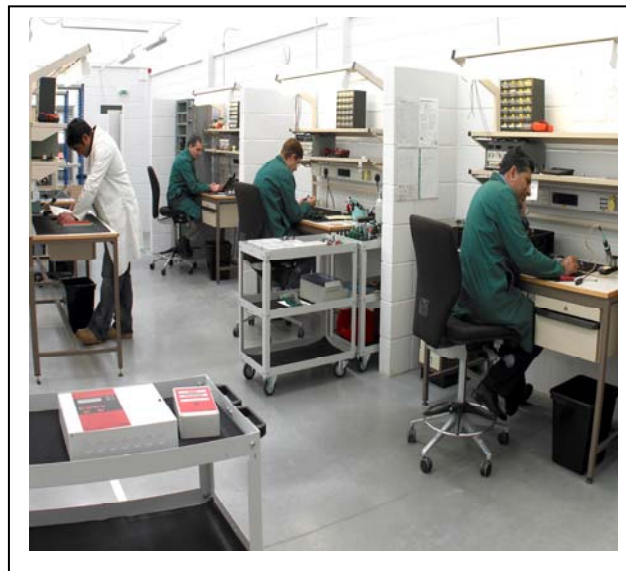

GDS Technologies Ltd specialise in the manufacture of gas monitoring and gas detection systems primarily designed for personnel protection against toxic, flammable and asphyxiant gases.

GDS products are targeted at commercial and industrial applications offering both standard and badged equipment to OEM, resellers and end users worldwide.

All instrumentation offered by the company has been designed and manufactured at our Leeds site by GDS under the highest quality standards ensuring a reputation for reliability and after sales service.

Our manufacturing facilities are ideally positioned for ease of distribution in both local and worldwide markets, whilst our friendly personnel make every effort to assist our distributors and customers ensuring speedy dispatch of all our products.

Situated in Garforth, Leeds the company is ideally placed for access to UK businesses via the M1/A1 motorway network, whilst the installation of a sophisticated telecommunications system allows communication with our worldwide market.

General Details

Company Originated	1987
Registered Office	GDS Technologies Ltd Fusion Point Ash Lane Garforth Leeds, LS25 2GA
Company Registration No:	3529380
Site:	Total floor area (UK) 1200 sq mt
Approvals:	BSEN ISO 9001:2008 (since 1993) QAN SIRA 00ATEX M071
Quality Auditors:	NQA - UKAS SIRA Certification Services CSA Canadian Standards Association
H & S Consultants:	SDL Health and Safety Ltd www.hsegroup.net
Environmental:	W.E.E.E Number AB0136ZT
Bank Details	Barclays Bank PLC 93/95 Main Street, Garforth, Leeds LS25 1YD
Insurer:	W.Denis - Insurance Brokers Plc www.wdenis.co.uk
VAT No.	481 8400 44
EC Commodity Code:	90271010
SIC Code:	3320
D-U-N-S Number	23-530-4669
Tariff No	902710

GDS Quality Policy

Quality Documents	BS EN ISO 9001 : 2000 QAN SIRA 00ATEX M071 Quality Manual and Procedures Workmanship Manuals Available for examination at our premises on request.
Calibration System	Traceable to NAMAS Equipment identifiable with calibration status.
Quality Records	Maintained for 10 years
Product Returns	All products to be returned are handled through an Equipment Tracking Number System (ETN).
Audits	External Auditors: NQA SIRA CSA Internal – planned schedule
Statement of Conformity	Supplied with equipment
Test Certificates	Supplied with equipment

GDS Product Range

- **Fixed Systems**

Combi, Gas Net, GDS404, GDS2010, GDS100, GDS202, GDS10

- **Flow Sample Systems**

GDS305, GDS306, GDS307, GDS301, GDS302

- **Remote Alarms**

Status I Indicator Panel, Status II Indicator Panel, 20 Way Indicator Panel, Repeater Panel, Snooper Repeater Panel

- **Detector Heads**

Hazardous & Safe Area Sensors

- **Test Equipment**

Sensor Check Gas Kit

- **Auxiliary Equipment**

32 Way Relay Panel, MV to 4-20mA Converter, Power Supply 24v DC

Field Service

Contact Maintenance / Repair

Planned Preventative Maintenance

Without effective inspection and maintenance even the best equipment will deteriorate and without rapid response even a minor fault could lead to major problems.

GDS's comprehensive service and maintenance ensures:

- Vital gas detection systems will work when they are needed
- Number of faults and duration of down times are minimised
- High levels of performance are preserved
- Continuing/on going upgrading and compliance with relevant legislation
- Discount from standard non-contract service charges

GDS offer premium rate contracts for two or four scheduled visits per annum which can be tailored around your particular circumstances, operating conditions and your budget.

Non-Contract Maintenance / Repair - UK

Short notice call-out to system repairs and maintenance throughout the UK with fixed day rate costs.

Repair/ Servicing Non GDS Systems - UK

If your system was not supplied by GDS you can still enjoy the benefits and peace of mind of engineering support from GDS and its distributor network.

Commissioning – UK / Overseas

Pre arranged visits to newly installed equipment where customers require our services on major projects requiring full client hand over.
